Correction: Int J Retin Vit 11, 18 (2025)

<https://doi.org/10.1186/s40942-025-00640-1>

Following the publication of the original article [1], the authors identified an error in the **Methods** section. The original text incorrectly stated that informed consent was waived due to the retrospective nature of the study. However, this study was conducted as a **prospective randomized clinical trial (RCT)**, and **informed consent was obtained from all participants** before enrollment. The corrected sentence should read as follows:

Original text (incorrect):

"Although this was an RCT, informed consent was waived due to its retrospective nature, as approved by the institutional ethics committee (approval number 209/2019)."

Corrected text:

"This study was conducted as a prospective randomized clinical trial (RCT), and informed consent was obtained from all participants. The trial was approved by the institutional ethics committee (approval number 209/2019) and adhered to the principles of the Declaration of Helsinki."

The original article [1] has been updated.

Published online: 27 February 2025

[†]Vinicius Campos Bergamo and Luis Filipe Nakayama have contributed equally to this manuscript.
